PROFILE SUMMARY

Full Stack Developer with 3+ years of experience building scalable web applications using MERN stack (MongoDB, Express.js, React.js, Node.js). Skilled in system design, REST API development, microservices architecture, and cloud deployment (AWS, GCP). Experienced in performance optimization, secure authentication (JWT, RBAC), and integrating AI-driven solutions.

EDUCATION

2023 - 2025

COLLEGE OF IT & MANAGEMENT
EDUCATION

- Master of Computer Applications

2020 - 2023

KHALLIKOTE UNITARY
UNIVERSITY

- Bachelor of Science in Computer Science

SKILLS

- Languages:** JavaScript, Python
- Frontend:** React.js, Next.js, Tailwind CSS
- Backend:** Node.js, Express.js
- Databases:** MongoDB, MySQL, PostgreSQL
- Cloud & DevOps:** GCP, AWS EC2, Docker, CI/CD, NGINX
- Security:** JWT, RBAC
- Tools:** Git, GitHub, Postman, Cloudinary,n8n,OpenAI
- Core Competencies:**System Design | API Integration | Microservices | Scalable Architecture | Performance Optimization

CERTIFICATIONS

- Google Cloud Infrastructure – Google
- Cloud Computing – NPTEL (Elite, 69/100)

WORK EXPERIENCE

DYNE INFOTECH PRIVATE LIMITED

2026- PRESENT

MERN Full Stack Developer

- Built end-to-end shipment tracking system with real-time milestone progression and unified HBL/MBL data mapping
- Developed smart status engine using fallback date logic for accurate shipment state
- Designed timeline-based dashboard with progress tracking and release/payment visibility
- Implemented secure route-aware data fetching using React Query (dashboard vs public tracker)
- Integrated AI-based document parsers with n8n webhooks for automated shipment processing

Freelancer

2025 - 2026

Freelancer

- Delivered 3 end-to-end client projects including e-commerce, portfolio, and inventory systems using the MERN stack including LLM API intigration(OpenAI).
- Deployed applications to cloud environments and provided ongoing maintenance and client support

Impulse RetailNet

2022 - 2025

MERN Full Stack Developer

A company specializing in logistics and supply chain solutions

- Built and deployed a hub-level Inventory & Operations Management Platform using React.js, Node.js, Express.js, and MongoDB for internal logistics teams
- Designed scalable REST APIs following microservices architecture and applied performance optimization techniques.
- Developed real-time dashboards for stock monitoring, low-inventory alerts, and order tracking, improving operational efficiency by ~40%
- Deployed and maintained production systems on Google Cloud Platform Compute Engine with MongoDB Atlas
